

Crusher

To press, for example, nuts, cobra, or palm kernel, with our oil press such material needs to be sized to pea size. The crusher has been especially designed for that particular purpose. It cuts cleanly and precisely, thereby eliminating a premature de-oiling.

Technical Data

Capacity in [kg] of input material / hour
(depending on type and Bulk of Density
of oil seed to be processed) 100 - 130

Electric Power of Drive Motor in [kW] 1.5

Weight in [kg]
(net only, without input material) 60

Dimensions in [mm]
